TENABLE FOR MEASURED INSURANCE

Helping Customers Secure Cyber Insurance

Measured

Key Benefits

- The Cyber Insurance Report has predefined metrics, validated by Measured Insurance, that give underwriters insight into an organization's cyber risk posture.
- Customers can easily export the report into a comprehensive PDF and share it with Measured and other cyber insurance providers.
- The partnership with Measured allows Tenable to better help you meet requirements for cyber insurance policies across vulnerability management, cloud security, identity security and more.

Business Challenge

Currently, many cyber insurance companies must rely on clunky and labor-intensive questionnaires built in excel or vendors that supply a risk assessment from an external view, which don't always give the full story. This leads to inefficiencies for the insurer and those seeking insurance. On one hand, the insurer has to accept unvalidated answers to security questions, and use subjective judgment on risk level. On the other, organizations must deal with risk-averse underwriters who will scrutinize their answers to determine whether they can offer coverage.

Solution

Tenable has partnered with an analytics-driven cyber insurance company - Measured Insurance. Tenable and Measured are striving to make assessing cyber risk more accurate while streamlining the process to gather underwriting information. We believe that better metrics are necessary to bring the insurance industry into the future. For Tenable.io customers, securing cyber insurance policies will be closer in reach and possibly less expensive. Measured assisted us with choosing the most useful metrics when determining whether a company is within their risk-tolerance for a policy. The exportable Cyber Insurance Report is the first of its kind and can be shared with Cyber insurance providers, giving customers a quick and easy way to demonstrate and prove their cyber risk posture.

Value

The Cyber Insurance Report crafted in partnership with Measured Insurance allows you to:

- Prove how secure your organization is, rather than focusing on breach response
- Give cyber insurance providers insight into your cyber hygiene, which can help streamline the underwriting process
- Share industry standard metrics in a comprehensive and easily digestible format
- Better understand your cyber risk and posture in the eyes of a cyber insurance underwriter
